

## **Tests for companies**

### **At our center**

A safe and healthy workplace has top priority in the current situation! That is why we offer both, the corona rapid test and the PCR test, for private individuals and companies.

In order to protect your employees and colleagues, we would be happy to reserve a longer period for you for groups on site in the AC med Corona test center.

### **At your company**

If you would like to have your employees and colleagues tested in a familiar environment in your own company, we would also be happy to visit you in your own premises.

Together we will find individual solutions for your circumstances in the company – always contactless and secure for everyone involved!
